## EXPERIENCE

---

### LV.Net

June 2017 - Current

#### Full Stack Developer

- Designed and delivered a shift system using the LAMP stack, saving the company 34 hours a day on managing employees shifts, clock in times, and time off requests.
- Utilized the shift system and timecards to create an automated write up system, decreasing the amount of workplace violations by 85%.
- Partnered with Field admins for interpreting fleet's GPS API data to automate field techs' timecards.
- Organized the fleet's GPS API visually using Google Maps API to create a convenient experience for admins to supervise field techs saving the company 20-30 hours a week.
